BENEFITS

- The 7600B is the largest, most productive grinder from the leading manufacturer of industrial grade grinding equipment.
- Process clearing debris, yard waste, storm debris and other mixed woody feedstocks into saleable products.
- Proven drive line protection system protects against catastrophic damage from contaminants.
- Like all Morbark equipment, the 7600B Wood Hog is a long-lasting, durable machine backed by a world-class parts and service support team.

Morbark Integrated Control Systems (MICS)
Automatically adjusts feed rates and monitors pressures and feed wheel position to maximize production and engine efficiency.

Hammermill
Laser-cut upturn rotor, factory balanced with forged hammers, offers unsurpassed durability and smooth operation.

Feed System
Internal planetary drive with no chains and sprockets means lower maintenance, more torque and better durability.

Grate Access
Hydraulic hinged door allows quick and easy access for changing grates.

SPECIFICATIONS

**General**
- Length (transport) .................. 47'
- Length (operating) ................ 70'11"
- Height .................................. 13'6"
- Height (operating) ............. 18'5"
- Width ................................. 11'8"
- Gross weight ...................... 106,500 lbs.
- Axle weight ......................... 67,560 lbs.
- Tongue weight ........................ 38,940 lbs.
- Engine .................................. CAT
- Horsepower ....................... 1050 HP to 1200 HP
- Fuel capacity (tank) ............ 430 gallons
- Hydraulic oil capacity .......... 260 gallons
- Brakes ................................. air
- Towing arrangement ............. fifth wheel
- Dust suppression system
- Hydraulically operated debris containment door
- Remote control with tethered back-up system

**Infeed System**
- Infeed opening 76" x 72"
- Variable speed infeed system consists of one 48" diameter top compression feed roll with internal drive and a 20" long x 72" wide hydraulically driven live floor equipped with five strands of WDH-120 chain in a staggered configuration with dual drives.

**Hammermill and Grates**
- 49 ½" x 72 ¼" Hammermill system is constructed of heavy-duty 35" diameter rotor, 18 1¾" two-piece thick "laser-cut" rotor plates keyed on a 9" diameter shaft with 5¾" bearings and 12 2½" hammer retaining rods. Hammermill has 18 2½" thick balanced forged steel fixed-teeth insert hammers, 18 3¾" wide double-edged replaceable inserts and 18 rakers.

**Discharge System**
- Discharge system consists of a hydraulically driven, horizontal 60" wide x 25' long aggregate belly belt conveyor discharging onto a 48" wide x 30' long stacking conveyor with hydraulic fold for transport.

**Options**
- Electric power
- Externally adjustable break-away torque limiter
- Automatic reversing fan system
- Radial stacking conveyor
- Variety of grates sizes available
- Magnetized end pulley with collecting slide tray for ferrous metal removal
- 11 HP air compressor with lockable enclosure
- Hydraulic rod puller
- ESPAR heating system for cold-weather start
