

JOHN DEERE

DOGGETT

DOGGETT PM AGREEMENT

Every piece of John Deere® equipment is designed and built to provide maximum productivity and operating economy throughout its working life. Doggett can help you maintain that built-in value through a PM agreement.

What is a Doggett PM contract?

A PM contract is any arrangement between you and Doggett that helps you lower your cost per unit of production. Agreements are tailored to fit your business needs and can range from simple Preventive Maintenance Kits to sophisticated performance guarantees. No matter which option you choose, you can be assured that Doggett will provide you with careful planning and ongoing attention that will help you succeed.

When you have a PM Contract you have more time to do what you do best - run your business. Trained dealer technicians assist you by maintaining your equipment and driving down operating costs. In the end, everyone's goal is the same - helping you get more work done at a lower cost.
