THE TOYOTA HIGH-CAPACITY REACH TRUCK.

Your fast-paced warehouse environment gets a workout day-in and day-out. When it comes to moving and storing products, the last thing you need is limitations. For tall tasks and heavy orders, you need the Toyota High-Capacity Reach Truck.

Need to reach high? How about a lift height of up to 45 ft. Need to lift heavy? How about a lift capacity of up to 4,500 lbs. When needing to do both, the High-Capacity Reach Truck can lift 2,150 lbs. to more than 42 feet. It all adds up to better cube utilization and versatility to store products when and where you need to. Slow- and fast-moving pallets get stored based on need and not on your equipment's limitations.

Don't limit your efficiency. Let the High-Capacity Reach Truck get to work for you today.

Lifting capacity varies based on truck configuration, lift height, and other factors. Please consult your local Toyota dealer for more information.

KEEP YOUR EYES ON THE PRIZE

INTELLIGENTLY BUILT, COMFORTABLY PRODUCTIVE

Keeping up with evolving throughput and storage density demands while managing fluctuating SKU counts presents challenges for warehouse managers and operators.

Toyota's High-Capacity Reach Truck enables you to reach higher, work smarter, and be comfortably productive regardless of the task at hand.

The High-Capacity Reach Truck's intelligent design empowers operators to complete tasks confidently and efficiently, shift after shift. The multifunctional control handle allows for simultaneous use of hydraulic functions and travel in one intuitive and ergonomic package. Rigid mast construction and an innovative suspension system help minimize mast sway for precise load handling at high lift heights.

The A-frame and caster steered idler reduces caster snap when backing away from a rack and during braking and cornering. An inertial dampener minimizes mast sway when right angle stacking at high lift heights for exceptional control.

EFFICIENCY TO KEEP YOU ON THE MOVE

Moving from pick to pick as quickly and efficiently as possible is the name of the game, and the Toyota High-Capacity Reach Truck delivers. Its powerfully efficient AC drive and lift motors offer superior acceleration, travel, and lift/lower speeds to maximize throughput while minimizing downtime. Regenerative lowering and plugging return energy to the battery when lowering the forks and plugging and coasting for more efficient operation and reduced energy costs.

The High-Capacity Reach Truck's impressive lift height is matched equally by its ingenuity. The standard 7" touchscreen display puts key information, programming, and diagnostic capabilities right at your fingertips.

For extra assistance when working in tall racking, the optional carriage-mounted camera system feeds video of the forks and pallet to the display for optimal control and precision. Optional Acculaser technology projects a light beam where the forks are positioned. The height and tilt indicator shows relative mast and fork positioning on the touchscreen display for even more precise load handling.

WORK HARD, PLAY HARD

Built using the Toyota Production System, the High-Capacity Reach Truck exemplifies the quality, durability, and reliability you've come to expect from Toyota. Ductile iron baselegs stand up to rigorous warehouse work with 30% more strength than steel. Bolt-on wheel plates make load wheel replacement quick and convenient to minimize downtime and service costs.

When handling loads, you'll appreciate the solid reach mechanism design with anti-friction scissors, radial thrust bearings, and a torsion tube scissor tie that helps mitigate lateral stresses. Even our control handle, with only 35 parts and flex circuit technology, offers low-maintenance operation.
